

Annex D:

Books and Journals**A. Textbooks**

More than 25 students are admitted to the medical school for the first year. Inevitably, some drop out of the program. The number of recent edition texts needed is estimated on the basis of the number expected to be in the class. The texts are not purchased by the students. Rather, at the end of each academic year the students return their books and receive the ones needed for the next academic year.
